*This summary is incomplete in that reports from all stations are not included. Only larger stations, or stations representative of a geographical area are included. Fluctuations in strength at some stations, or in some areas, may be the result of not having received all reports from those stations or areas at the time this summary is published. What formerly appeared as geographical areas (New York City, Washington, D.C., New Orleans, San Antonio, Los Angeles, etc.) in this report have, with this issue, been broken down to show the component stations and the General Hospitals. The admission rates for the General Hospitals are, as may be expected, much higher than for the stations due to the fact that for the majority of admissions, corresponding strength is not carried by the General Hospitals.														
** Only some stations included in this area show EPTI.
